Impex Exhibition

Pittsburgh 2004

## Pyroflex the little sister of Firetrace has come of age

At the recent Impex International Inventors Exhibition in Pittsburgh Pennsylvania, Pyroflex the tube only miniature automatic fire extinguisher system was awarded the 'Art Fry Excellence in Innovation Award 2004'

This prestigious award was personally presented to Dave Melton by Mr. Art Fry who is, as you may know, the gentleman from 3M's who invented the Post-it note. As a research scientist and being famous among inventors, Art is often called upon to judge at this type of event. During his presentation speech Art mentioned that he has had a lifetimes experience in innovation but had never before seen a product that appeared so disarmingly simple, with such enormous potential to save life and property from the horrors of fire.
